

# Clinical Rotations Designed for U.S. Medical Students

*The clinical experiences you need. Guaranteed.*

Benefit from nationwide location options for your rotations and ensure sites meet your school's curriculum requirements.

## ROTATIONS THAT MEET YOUR NEEDS

Our clinical partnerships allow us to offer guaranteed seats at top clinical training sites across the U.S. to students at our partner medical schools.

### Electives Where You Need Them

Finding fourth-year elective rotations in the cities, states, or even hospitals you eventually want to Match in is not always available through your school.

Our platform offers 70+ specialties and subspecialties across the country to help you get to where you want to go.

### Join Top-Level Research Projects

With the COMLEX exam moving to pass/fail, AMO's research rotations help future residency applicants stand out on the Match with the possibility for publication or co-authorship.

### Residency Preparedness Programs

From fellowships to audition rotations at ACGME residency sites and top hospitals across the country, AMO helps you showcase your clinical skills to residency directors and earn LoRs from the country's top physicians.

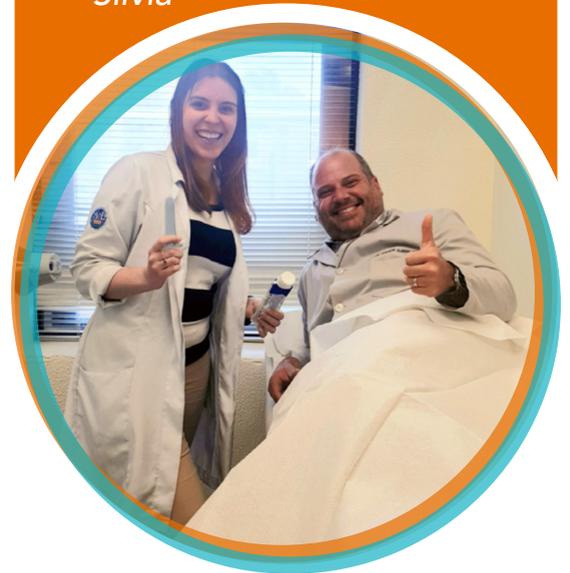

### Graduate Programs

Stuck between graduation and the Match? Certain AMO programs are designed exclusively for graduates. Many of these programs are with residency program directors. Not only will you close any gaps between graduation and the Match, but you will build deep relationships with preceptors who will help guide you through the Match process.

*"There are a few moments in your life that change it forever. My rotation with AMO opportunities was one of these moments."*
