

Your Guide to Securing Affiliation Agreements

When you work with AMO opportunities to secure affiliation agreements, these steps help to ensure success.

Contacting the Health System

Because your affiliation agreement is between your school and the training site, an agreement is more likely to be successful when your school initiates the request.

AMO can guide your team through the outreach process and provide insights into which departments to connect with.

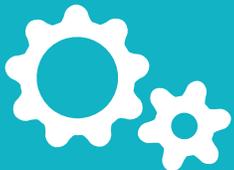

Preceptor Agreements

While your affiliation agreement is between your school and the health system, AMO secures affiliation agreements with individual preceptors on your behalf.

AMO handles these affiliation agreements from recruitment to onboarding.

Replacements with Ease

If an affiliation agreement cannot be secured, or in the case of last-minute cancellations, AMO's recruitment team will identify a replacement site from within our current network or recruit a site that meets your unique requirements.

**Ready to secure your next affiliation agreement?
