

12-Month Research Fellowship

Surgery and Wound Care

AM OPPORTUNITIES

Serena Group offers a year-long research fellowship that is focused on training clinical researchers in surgery and wound care treatments for non-healing, complex injuries.

Why a Fellowship With Serena Group?

The fellowship is located at Serena Group's clinical site in Monroeville, Pennsylvania, a suburb of Pittsburgh. The location opens an opportunity for fellows to establish a wide professional network in a main healthcare hub of the U.S.

Serena Group's fellowship is also designed to strengthen fellows' residency candidacy. Upon completion of the fellowship, fellows can expect to have:

- Multiple research publications to add to their CV
- Completed a 40-hour Introduction to Hyperbaric Medicine and Wound Care Challenges course
- Received additional clinical exposure
- Worked with other specialties, including infectious disease, surgery, and others

\$30k
Program Cost

Fellowship Expectations

Fellows will work with a team of physicians in a multimodal learning environment as they develop new skills in rehabilitating patients with complex wounds.

Fellows can expect to:

- ✓ Work with patients of all ages
- ✓ Split time between the wound center and clinic
- ✓ Learn advance technologies in wound care

In addition to the above, fellows can expect to learn advance technologies, gaining competencies in:

- ✓ The role of oxygen in wound healing
- ✓ Hyperbaric oxygen therapy
- ✓ Punch biopsy
- ✓ Application of cell- and tissue-based therapies
- ✓ Negative pressure therapy

Who is Eligible?

The fellowship is open to all medical students, including pre-med students, medical students, and medical school graduates. **For students or graduates outside the U.S., the fellowship sponsors a J-1 Visa.**

**THIS FELLOWSHIP
IS AVAILABLE
TO ONE FELLOW
PER YEAR.**
