

Eight Week Enhanced Internal Medicine Observership

University of Pittsburgh Medical Center

Through our partnership with University of Pittsburgh Medical Center - an ACGME teaching site - your graduates will do more than rotate. They will gain instruction, mentorship, and letters of recommendation to increase U.S. residency matching success.

Benefits of UPMC's Enhanced Observership

UPMC's Enhanced Observership is designed to increase the success rate for graduates in the U.S. residency match. Through this experience, graduates have the opportunity to develop clinical skills through standardized patient training and access to medical records. This provides graduates with real-world cases to practice determining treatment methods.

Beyond clinical skills, the observership helps graduates improve professional skills and provides networking opportunities.

Weekly Group Meetings

Graduates meet weekly in small groups with the attending physician to engage in clinical discussions and present on the patients they observe.

Professional Mentorship

Your graduates receive one-on-one mentorship to help them build their C.V., applications, personal statements, and other professional materials.

U.S. Residency Prep

Graduates have the opportunity to earn two letters of recommendation and practice interview skills.

UPMC

LIFE CHANGING MEDICINE

About UPMC

A \$24 billion healthcare provider and insurer, Pittsburgh-based UPMC is inventing new models of patient-centered, cost-effective, accountable care. The largest nongovernmental employer in Pennsylvania, UPMC integrates more than 92,000 employees, 40 hospitals, 800 doctors' offices and outpatient sites, and a more than 4-million-member Insurance Services Division, the largest medical insurer in western Pennsylvania.

8 Weeks \$11,999

Schedule a meeting with AMO's Partnership Director, Daniel Rivers, and take the next step toward expanding clinical training opportunities for your graduates.
