

## Seven Great Reviews of AMO Virtual Rotations

Check out what previous virtual medical trainees have to say about their virtual rotations

AMOpportunities offers virtual rotations that provide medical trainees with an orientation to telehealth and virtual patient care. These experiences allow trainees to observe real-time doctor-patient consultations, making virtual clinical experiences an asset to any 21st century medical education.

### **FAMILY MEDICINE AT MIAMI BEACH COMMUNITY HEALTH CENTER**

It was a great opportunity and worth every cent. I learned about telemedicine, HIPAA procedures, EMR, improved my Spanish language comprehension, how a Family Medicine Physician agenda is organized, and how a medical clinic works. I also had important lectures during this rotation. My preceptor was very professional, ethical and polite. So, I'd like to thank her, all MBCHC staff and AMO opportunities for this enriched experience.

– Sarah, Brazil | August 2020

### **INTERNAL MEDICINE/ENDOCRINOLOGY AT PREMIER ENDOCRINOLOGY**

I did two virtual rotations in 2020, one in September and the other in October...Both experiences were the eye-openers I needed to understand the U.S. medical system. I learned to love it even more. I can say that with so many things moving online, it's a good idea to try at least one virtual rotation. It's a great learning experience, and I'd do more in the future!

– Ijeoma, Europe | September & October 2020

### **PEDIATRICS WITH VOLUNTARY FACULTY CLINICAL ASSISTANT PROFESSOR, BAYLOR COLLEGE OF MEDICINE**

For me, it was very important and satisfying to be able to have a clinical experience in the US, as my goal is to apply to residency there. Speaking about AMO, I am so glad I chose you to work with me and to help guide me during the process. You guys have been excellent and without any doubt I would recommend you to other physicians who are on the same route as me. Thank you for always being there and helping me out...I am looking forward to having more experiences with you... and now that telemedicine is available it is even easier.

– Carla, Colombia | October 2020

### **PLASTIC SURGERY WITH HARVARD PLASTIC SURGERY RESIDENCY, PROGRAM DIRECTOR**

Being an aspiring plastic and reconstructive surgeon, rotating virtually with Dr. \*\*\* was an amazing experience. Dr. \*\*\* was always available to answer questions, share his experiences, and engage with us in clinical case-based group discussions. He is also a great mentor and supporter. I'm definitely more confident with my knowledge in plastic surgery now!

– Rawan, Kuwait | August 2021

### **FAMILY MEDICINE AT BLUEGRASS FAMILY MEDICINE AND PEDIATRICS**

I completed my 4 weeks virtual tele-rotation in November 2020 at Bluegrass Family Medicine and Pediatrics, Lancaster, KY. This was an awesome experience. I met two other IMG. Our mentor Dr. A. was not only a great physician but has a great personality as well. Thank you AMO for giving me the opportunity to learn from Dr. A. His way of teaching is extraordinary, and comes without added pressure or feelings of inadequacy, He always makes sure not to leave anyone behind in the discussion part and does not put anyone down. Special thanks to AMO for helping us during these challenging times.

– Elka, Bulgaria | November 2020

### **NEUROLOGY WITH CLINICAL PROFESSOR IN NEUROLOGY, GEORGE WASHINGTON UNIVERSITY SCHOOL OF MEDICINE**

I think this is one of the greatest learning experiences one can ever possibly have. There are not only neurology patients, but also other internal medicine patients and others with psychiatric conditions. Dr. \*\*\*\* looks up a research article for every single case that comes into the clinic and discusses it thoroughly when the patient leaves, so the case is forever carved in one's mind. He also shows a lot of relevant educational videos. Everyone is very friendly and welcoming; you can tell from the first time you meet Dr. \*\*\*\* in the orientation. Everyone is also very professional and very knowledgeable about all the conditions and all the patients. Dr. \*\*\*\* teaches what is to truly develop a loving doctor-patient relationship and knows every single patient inside out and rules out every possible condition there is before establishing a diagnosis.

– Hala, Jordan | October 2020

### **PLASTIC SURGERY WITH HARVARD PLASTIC SURGERY RESIDENCY, PROGRAM DIRECTOR**

The preceptor was amazing and very inspirational during this 4 week rotation. He has developed and planned a very well-structured teaching curriculum that is supplemented by videos and lectures which allows us to clear our doubts and gives us a better insight into the topic. Dr. \*\*\* is also very approachable and supportive. This is a highly recommended program that gives you the breadth and depth of Plastic Surgery for anyone who is interested in this specialty.

– Jeremy, Singapore | July 2021
